# Carestream INDUSTREX M37 Plus and M43ic Processors

for Non-Destructive Testing

#### HIGH-PERFORMANCE PROCESSORS FOR NON-DESTRUCTIVE TESTING

Quality images, efficient output, energy and water savings.

MEET TWO POWERFUL INNOVATIONS FOR PRODUCING HIGH-QUALITY NDT RADIOGRAPHS. CHOOSE THE INDUSTREX M43ic FOR HIGH-VOLUME OUTPUT OR THE INDUSTREX M37 PLUS FOR SPACE-SAVING DESIGN AND MID- VOLUME OUTPUT.

These feature-rich processors include state-ofthe-art microprocessor control, to automatically monitor and regulate:

- Developer temperature
- Drying temperature
- Developing time
- Replenishment rates

#### **FEATURES INCLUDE**

- Automatic stand-by mode for low water and power consumption, environmental friendly
- Filtered developer processing solutions
- High Capacity, ranging from 33-58
   35cm x 43cm sheets/hour based on model
- Automatic tank solution replenishment.
   Microprocessor calculates amount of film entering processor based on the input of sensors; it then uses the data to precisionmeasure the replenishment fluid needed.
- Anti-oxidation standby mode. This function prevents oxidation and chemical breakdown by automatically injecting developer solution into the tank when unit is not in use.
- Superior film-drying system. Processors dry film thoroughly without the use of damaging infra-red technology.
- Specialized transport rollers protect film. Eliminate crystallization of chemicals on rollers, and minimize dirt and debris deposited on film. Processor rollers remain submerged in solution when not in use—keeping them clean and running smoothly.

### INDUSTREX M37 Plus Processor

The tabletop INDUSTREX M37 PLUS is ideal for automatic processing in mid-volume facilities. While compact, it offers the output you need and the excellent image quality and reliability you demand.

The new INDUSTREX M37 Plus film processor incorporates all the experience and features you've come to expect from the INDUSTREX line of products for NDT applications. The processor ensures totally automatic film handling and supports nine programmable-controlled processing channels that allows for flexibility in your day-to-day NDT film production.

#### THE INDUSTREX M37 PLUS PROCESSOR FEATURE SET INCLUDES:

- Ease of operation with nine programmable-controlled processing channels
- 43cm processing width
- Economical medium-range processor with capacity of 33 sheets/hour (35cm x 43cm) in the recommended processing cycle
- Compact design for smaller labs or environments
- Filtered developer solution that reduces film artifacts
- Intermediate rinse rack bath system
- Can be used in stand-alone darkroom or through-the-wall installations
- Automatic film-in detection utilizing a pulsed infra-red sensor bar
- Automatic replenishment system for developer and fixer
- Automatic heating for developer and fixer
- Automatic anti-oxidation and anti-crystallization cycles
- Separate drainage for developer, fixer and wash chemicals
- Factory fitted replenisher tank level control assemblies with a plug connection into the processor
- Incoming water temperature sensor beeper alarm when wash water temperature is outside the programmed range
- Enhanced cold water cooling system
- Unit pre-configured with connection fittings to simplify installation of optional external chiller
- Automatic wash water top off at start-up

#### STANDARD ACCESSORIES INCLUDE:

- Two 30-liter replenisher storage tanks
- Light tight feed-tray cover
- Table stand
- Re-locatable controller unit for operator convenience
- Spare part kit

### **INDUSTREX M43ic Processor**

Designed for the needs of high-volume Non-Destructive Testing customers, the INDUSTREX M43ic provides multiple processing cycles and dry-to-dry processing in as little as five minutes.

This processor also comes standard with an integrated closed-loop chiller to ensure consistent temperature in hot environments or when water supply is not temperature controlled to further enhance capability and image quality in harsh NDT environments.

## THE INDUSTREX M43ic PROCESSOR HAS A ROBUST FEATURE SET THAT INCLUDES:

- Up to nine programmable-controlled processing channels for maintaining preferred settings such as processing speed, developer temperature, fixer temperature, dryer temperature and replenishment rates
- High processing capacity of up to 58 sheets/hour (35cm x 43cm) in the recommended processing cycle for improved productivity
- An intermediate fix rinse system that enhances process uniformity to both sides of the film
- Feed-tray cover that allows for room light operation
- Filtered developer solution that reduces film artifacts
- Integrated chiller unit that maintains developer temperature uniformity in hot environments
- Two 50-liter replenisher storage tanks
- Low level monitoring of all tank solutions
- Automatic tank solution "Top-Up" control that maintains correct solution levels upon processor start up
- Work-in-progress monitoring
- Integrated connectors to an external exhaust air system

#### **INTERFACE DISPLAY**

The units' intuitive keypad interface simplifies operation, and allows new users to become experts in a hurry. Touch a few buttons, and you can preprogram up to nine different settings to automatically accommodate your most frequent applications. Install these processors for free-standing operation in darkroom or for convenient through-the-wall feeding—load exposed film in darkroom, collect processed films in normal room light.

## INDUSTREX M37 Plus and M43ic Processors Specifications

Category Group	Standard Specifications	M37 Plus (Material no. 5314620)	M43ic (Material no. 5147814)
Application	Unit Description	Table-top, medium capacity general NDT radiography	Floor-standing, high capacity general NDT radiography
	Site application	Intended for fixed laboratory installation	Intended for fixed laboratory installation
		(Not recommended for mobile lab applications)	(Not recommended for mobile lab applications)
Film	Film format types	Rolls & Cut sheets of NDT x-ray films	Rolls & Cut sheets of NDT x-ray films
	Recommended development time & temperature	110 sec development time (22 cm/min) @ 28° C	100 sec development time (39cm/min) @ 26°C
	Film sheets processing capacity/hour (35x43 cm)	33 sheets/hr @ 110 sec recommended development time	58 sheets/hr @ 100 sec recommended development time
	Film thickness	0.10 mm-0.18 mm	0.10 mm-0.18 mm
	Material length (minimum)	10 cm minimum	10 cm minimum
	Material width	7.0 cm-43.0 cm Note: For multi-loading of narrow width films, feed tray loading guides are required for film widths 70mm-100mm and are available from the OEM as an accessory	7.0 cm-43.0 cm Note: For multi-loading of narrow width films, feed t loading guides are required for film widths 70mm-100mm and are available from the OEM as an accessory
Time/speed	Cycle time (dry to dry) (min)	3.9-11 min (7 min @ 110 sec. recommended development time)	2.1-12.6 min (8 min @ 100 sec recommended development time)
	Intake speed (cm/min)	39.6-14 cm/min (22 cm/min @ 110 sec. recommended development time)	128-22 cm/min (39 cm/min @ 100 sec recommended development time)
	Time in developer (sec)	Range: 60-170 sec (22 cm/min @ 110 sec recommended dev time)	Range: 60-184 sec (39 cm/min @ 100 sec recommended dev time)
Transport	Developer to Fixer crossover style	Water rinsed crossover rollers to minimize carryover of developer into fixer	Fixer spray bar style crossover
rocessing Solution	s Adjustable Replenishment rates	Yes, set in ml/m2 of film processed	Yes, set in ml/m2 of film processed
	Cooling liquid	Incoming cold water supply	2.5 L chiller fluid
	Cooling system	Enhanced incoming cold water cooling system <i>Note</i> : Requires incoming water supply with temperature range of 7°C-15°C. *	Integrated internal chiller with closed loop cooling system (Included accessory)
	Chiller connectivity	Unit is adapted with double cooling system for ease of use with	N/A (chiller built in)
	Replenisher tanks	external chiller accessory (not included) *  2x30 liter w/dust cover lids and floating lid for developer tank	2x50 liter/dust cover lids and floating lid for developer tank
	Low Replenisher tank solution alarm	Yes *	Optional accessory ordered from OEM
	Replenishment type	Automatic IR scanning sensor based on film area	Automatic IR scanning sensor based on film area
	Solution filter elements	Developer filter	Developer filter
Developer		Adjustable in a range of 18°C-43°C	Adjustable in a range of 18°C-43°C
	Solution Heating (developer and fixer)	(separate in-line 350W heaters)	(separate in-line 350W heaters)
	Solution level monitoring	Yes, wash tank standard on M37 Plus unit	Yes, with automatic top off at start up of developer, fixer and wash ta
	Developer tank size	7.5 L (including developer filter system)	13.4 L (including developer filter system)
	Developer tank recirculation pump	Yes	Yes
